

## **My Great Green Geese Adventure!**

**Did you know that when they first hatch, Canada geese goslings are yellow with greenish grey heads?**

### **The day I saw Green Geese.**

**After my nature walk, I was on my way back to our Cabin at Centre Parks. As we went round the corner I spotted an amazing site, an island full of Canadian geese. I've never seen so many geese in my life. Lots of them were cuddled together and the rest were just waddling around. I said that I would like to call the island Goose Island. We watched them for 20 minutes or so, then we headed back to the cabin. Time flew by and when we reached the cabin we walked in inside and my mum was sat by the sliding door feeding something. I went closer to investigate. What was she looking at? I could not believe my eyes. I immediately ran to the kitchen to get some monkey nuts. Then, I grabbed my sister and headed back to the sliding glass door when right in front of us stood two adult Canadian geese and three goslings that were still green!**
